It is the toughest to instigate the end...

I still remember that lively April morning in 2012 when I stepped into Dr. Balagopalan Unni's lab. Though it was not my first visit to the lab, this time it felt different. Along with me came my anxiousness, my uncertainties and myriads of expectations. But today when I reminisce, I feel utterly fortunate that I had made that decision. I now realize that with that footstep, I embarked on a 'voyage', an immensely enjoyable journey saturated with lessons of science, friendship and life itself. Yet, like all good things in life this joyride too had to come to an end. Today, as I sit writing this page, many names come rushing to my mind in warmth and gratitude for standing by me all along, bracing my drooping spirit when work threatened to overtake emotions. As the 'terminus' is approaching, I think this is the best moment to express my appreciation to all those wonderful people around me who have left their mark in my work and life.

It is beyond hesitation that the most influential personalities in my Ph.D. career has been my teacher, mentor and guide, Dr Balagopalan Unni, Director, Research-Biological Sciences, Assam Down Town university, Guwahati and Dr. Robin Kumar Sharma, Pro-Vice Chancellor ,University of Science and Technology Meghalaya, Meghalaya. Dr. Unni's passion, guidance and discipline have been indispensable to my growth as a student and as a person over these past three and a half years. He has grown beyond his job as a supervisor to that of a role model in my life. His patience, principles and loving nature are qualities that I strive to inculcate in my life. I would like to express my heartfelt gratitude to Dr. R.K. Sharma who have been also became the major pillar of my professional life, transforming my interests into something concrete and fundamentally important in the field of my research by guiding me wisely through the rapids of exciting intellectual scientific exploration.

I am also indebted to Dr. Pranab Kumar Baruah, Head & Medical Officer, Clinical Centre CSIR-North East Institute of Science & Technology, Jorhat for his stimulating discussions and active participation in this work. His visions and advice has been a constant source of development.

I am thankful to Dr. Thaneswar Borah, Medical Officer, Clinical Centre CSIR-North East Institute of Science & Technology, Jorhat, for his constant support towards my work and for his ever smiling and understanding nature.

My gratitude is also due to Dr. Jatin Kalita, Department of Biotechnology, CSIR-North East Institute of Science & Technology, Jorhat for his outstanding contribution and valuable co-operation, without which this work was just impossible.

I am really thankful to Dr. Prasenjit Manna, Mr. R.C. Bharali of CSIR – NEIST, Jorhat and Dr. Gautam Sharma of USTM, Meghalaya from my heart for their great help in my work.

I am fortunate to have had company of my other lab mate specially Tapan and Moonme. They were always ready to lend a hand whenever the need was.

Last but not the least I am highly thankful to my parents, Mr. Rojit Ch. Khound, Mrs. Usha Kiran Dutta Khound, my wife Gitashree, my brother Dhrubajyoti, sister Runumi my son Rang and friends for their never ending support and encouragement.

I express my sincere thanks to all members of the Department of Biotechnology, CSIR-North East Institute of Science & Technology, Jorhat for being so nice to me and providing me all possible facilities during my research.

I am sincerely appreciated and extremely grateful to the Director, CSIR-North-East Institute of Science & Technology, Jorhat, Assam (India), for constant support and encouragements and giving me the opportunity to work in the laboratory of internationally standard, Council of Scientific & Industrial Research (CSIR) and Department of Science & Technology, Govt. of India for research grants. The project work has been funded by the Network Project (BSC-0111), INDEPTH sponsored by CSIR, Govt of India.

Finally, I owe it all to the Almighty who showered all his blessings and benevolence on me to complete my research work.

27th October, 2015
