Abbreviations

1. Chapter 1:	1 - 10
Introduction	
1.1. Introduction	2 - 8
1.2. Background about Coagulase	8 - 9
1.3. Importance of Coagulase	9
1.4. Statement of the problem	9 - 10
2. Chapter 2:	11 – 25
Review of literature	
2.1. Historical	12 - 13
2.2. Characteristics of Staphylococcal strain	13 - 25
2.2.1. Virulence Factors	13 – 17
2.2.1. I. Hemolysins	14 – 15
2.2.1. II. Staphylococcal Hyaluronidase	15 - 16
2.2.1.III. Leucocidin	16
2.2.1. IV. Capsules	16 - 17
2.2.2. Staphylococcal Coagulase	17 - 25
2.2.2.I. Overview	17 - 22
2.2.2.II. Production of Coagulase	22 - 23
2.2.2.III. Action of Coagulase on Plasma of Various Animal Species	23
2.2.2.IV. Techniques for Determination of Coagulase	23
2.2.2.V. Chemical Nature of Coagulase	24
2.2.2. VI. Filterability of Coagulase	24 - 25
2.2.2. VII. Action of Physical Agents	25
2.2.2. VIII. Action of Chemical Agents	25

3. Chapter 3:

Materials and Methods	26-58
3.1. Catalase test	27 - 28
3.2. Bacterial growth on Manitol salt agar	28 - 29
3.3. Antibiotic sensitivity test	29 - 30
3.4. Coagulase test	30 - 31
3.5. Culturing of the bacterial strain	31 - 32
3.6. Estimation of total CFU	32 - 34
3.7. Characterization of bacterial strain by Gram staining	34 - 35
3.8. Isolation of extracellular proteins from bacterial strain	35 - 38
3.9. Estimation of extracellular protein concentration	38 - 40
3.10. Column chromatography	41
3.11. Lyophilization	41
3.12. Blood Coagulating Activity (Bioassay)	41 - 42
3.13. SDS gel electrophoresis	42 - 45
3.14. HPLC fractionation	46 - 49
3.15. Coagulation assay of the purified protein sample	49 - 53
3.16. Computational analysis of coagulase protein	53-55
3.17.1. Isolation of genomic DNA from the bacterial strain	55 - 56
3.17.2. Preparation of agarose gel for electrophoresis	56 - 57
3.17.3. PCR amplification and sequencing	57
3.17.4. Data analysis	58

4. Chapter 4: 59- 84

Results and Discussion

4.1. Identification and characterization of the bacterial strain	60 - 64
4.1.1. Catalase Test	60 - 61
4.1.2. Bacterial growth on Manitol salt agar	61
4.1.3. Antibiotic sensitivity test	62

4.1.4. Coagulase test	63
4.1.5. Culturing of the bacterial strain	63
4.1.6. Estimation of total CFU	63
4.1.7. Characterization of bacterial strain by Gram staining	64
4.2.1. Isolation of extracellular proteins from bacterial strain	64 - 66
4.2.2. Dialysis and Lyophilisation	66
4.2.3. Estimation of extracellular protein concentration	66
4.2.4. Blood Coagulating Activity (Bioassay)	67 - 69
4.2.5. Stability of the coagulase protein in different temperature	69 - 70
4.2.6. SDS-PAGE for determination of molecular weight	70
4.2.7. HPLC fractionation	71 - 77
4.3. Computational analysis of coagulase protein	77 - 83
5.1. PCR amplification and sequencing	84
5. Conclusions	85 - 88
6. References	89 - 100
7. Publications	101 – 104
