

List of tables

- I. Historic description of *Staphylococcus* genus reflecting the early detection of coagulase positive strains.**
- II. Properties of Staphylocoagulase**
- III. Protein content during different phases of purification.**
- IV. Composition and quantification of the amino acids present of 66 KDa protein fraction.**
- V. Composition and quantification of the amino acids present of 33 KDa protein fraction.**
- VI. Composition and quantification of the amino acids present of 14 KDa protein fraction.**
- VII. Ramachandran Plot analysis of the generated model of the coagulase protein.**
- VIII. Assessment of stereo chemical and geometrical parameter of the generated model through PROCHECK and ERRAT.**
- IX. Protein Binding Sites with XYZ direction and respective volumes.**
