Abstract	XV-XVII
Chapter 1 Introduction	1-18
1.1 Concept of Malaria	1
1.2 Life Cycle of Malaria Parasite	2
1.3 Types of Malaria	3
1.4 Symptoms of Malaria	4
1.5 History of Malaria Control in India	4
1.6 Assam: An Overview	6
1.7 Malaria in Assam	8
1.8 Physical Performance: Surveillance and Case Management	8
1.9 Integrated Vector Control	9
1.10 Recent trends of Malaria	9
1.11 Profile of the District: Kamrup Metropolitan District	10
1.12 The Study Area: Sonapur Block	12

1.13	General account of the research areas	13
1.13.1	Study Village	14
1.13.2	Control Village	16
1.14	Statement of the problem	17
1.15	Objectives	18
Chapter 2 Review of literature		19-32
2.1	Epidemiology of Vector-Borne Disease	20
2.2	Epidemiology of Malaria	20
2.3	Effect of Climate change on Malaria and other Vector-Borne Diseases	21
2.4	Impact of Forest areas in Malaria Transmission	21
2.5	Relationship between Socio-economic and Nutritional Status with Malaria	22
2.6	Gender Role in Malaria Control	22
2.7	Relationship between Socio-economic and Nutritional Status and Malaria	23
2.8	Food Varieties and Physiochemical in Malaria Control	28
Chapter 3 Materials and Methods		33-56
3.1	Study of Prevalence of Malaria among the Community	34
3.1.1	Mass Blood Survey (MBS)	34
3.1.2	Asymptomatic Survey	34
3.1.3	Fortnight Fever Survey	34
3.2	Study of Socio-economic Status of the Community	35
3.3	Evaluation of Nutritional Properties	35
3.3.1	BMI Status of the Children =<15 years	35
3.3.2	Food Varieties and Methods of Preparation	35

3.3.3	Phytochemical Analysis	40
3.3.4	Nutritional Analysis of Food Contents	46
3.4	Statistical Analysis	48
Chapter 4 Results		57-95
4.1	Prevalence of Malaria among Community	57
4.2	Socio-economic Status of the Community	61
4.2.1	Age-wise Distribution of Study and Control Village	61
4.2.2	Status of Educational Qualification of Study and Control Village	61
4.2.3	The Occupational Pattern of respondents	62
4.2.4	ST/Non-ST Status	63
4.2.5	Income Level	63
4.2.6	Marital Status	64
4.2.7	Family Type	65
4.2.8	Knowledge of Malaria	65
4.3	Nutritional Evaluation of the Community	74
4.3.1	BMI status of the =<15 years of Children	74
4.3.2	BMI Criteria with Sex Distribution	74
4.3.3	Association of Malaria with BMI	75
4.3.4	Study of food variety and methods of preparation	78
4.3.5	Chemical analysis of food varieties consumed by the communities	80
4.3.6	Phytochemical analysis	87
Chapter -5 Discussion		96-105
Chapter -6 Summery		106-111
Chapter-7 Conclusion and Suggestions for future works		112
References		113-139
Annexure: Photographs of Study Village and Control Village
